RESCUE SIMULATOR

Extrication from an accident

After a fictional accident, your car is lying on the roof. You are now hanging upside down in the car with your full body weight, with only the seat belt preventing you from falling off. You no longer know which way is up and which way is down, and you need to get out as quickly as possible. The scenario is set up by a professional moderator who provides the participants with important tips on how to get out of this difficult situation.

Practice how to rescue other people and yourself in this special simulator.
